

Project Design Phase-I ProposedSolution

Title	IoT Based Safety Gadget for Child Safety Monitoring and Notification.
Domain Name	Internet of Things (IOT)
Team Lead	Gopi V
Team Member	Raja K Nandakumar A Sundaramoorthy A
Mentor	Suganya J
Team ID	PNT2022TMID29157
College Name	Mailam Engineering College
Department	Electronics and Communication Engineering

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	When someone near the child this device alerts the parents whereas the parents in another distanced place.
2.	Idea / Solution description	The aim of this device is to provide safety to the child by allowing the parent to locate the child and view their surroundings. This device can be used to monitor the temperature and motion of the child. The other features of the device are emergency light and alarm buzzer which are activated when the ultrasonic sensor senses something near child. After automatically send the SMS to parents and call also received to the parents.
3.	Novelty / Uniqueness	The enhancements will be adding more features, software, applications, hardware to make the proposed system.
4.	Social Impact / Customer Satisfaction	The feedbacks of parents and children were highly promising. Results showed that 86.4% of the parents are satisfied with the time controller, around 91.1% of the children are satisfied with the proposed interface and 100% of the children are satisfied with the multiple sessions of the time allowed and video algorithm.
5.	Business Model (Revenue Model)	IoT based risk monitoring device for child is done through smart device i.e., smart watch. Through this device the respected parameters are monitored by the connected person.
6.	Scalability of the Solution	It can be given up to 4 out of 5.
