# **DEVELOP THE WEB APPLICATION USING -RED NODE**

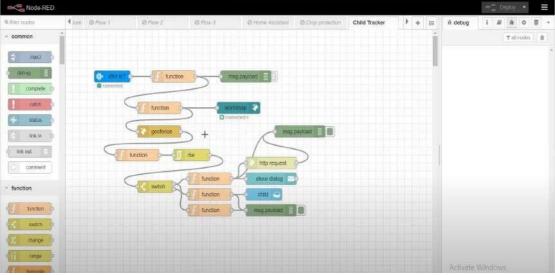

Title	IoT Based Safety Gadget for Child Safety Monitoring and Notification.
Domain Name	Internet of Things (IOT)
Team Lead	Gopi V
Team Member	Raja K
	Nandakumar A
	Sundaramoorthy A
Mentor	Suganya J
Team ID	PNT2022TMID29157
College Name	Mailam Engineering College
Department	Electronics and Communication Engineering

## **Develop The Web Application Using Node-RED**

1. To Develop the web application using Node-RED

#### Steps:

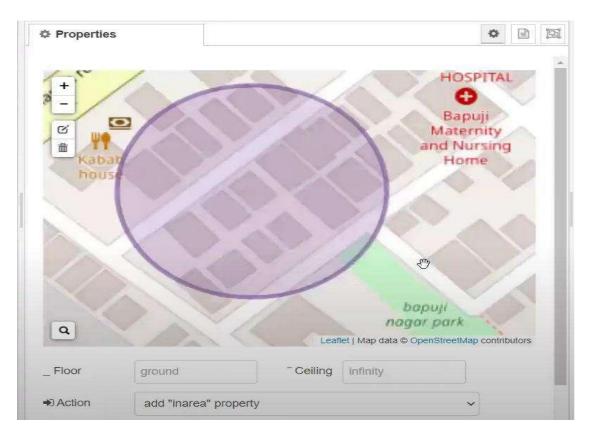

1. Open a Node-RED project

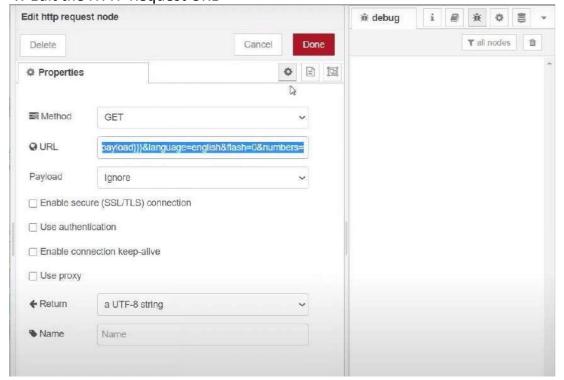

2. Add code to get child location in python

```
import json
import wiotp.sdk.device
import time
myConfig = [
      mfig = {
  "identity": {
    "orgId": "hj5fmy",
    "typeId": "NodeMcU",
    "deviceId": "12345"
     ),
"auth": {
            "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
Thile True:
           name= "Smartbridge"
           #in area location
           latitude= 17.4225176
           longitude= 78.5458842
           #out area location
           #latitude= 17.4219272
           #longitude= 78.5488783
myData={'name: name, 'lat':latitude, 'lon':longitude}
client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
print("Data published to IBM IoT platfrom: ",myData)
            time.sleep(5)
client.disconnect()
```

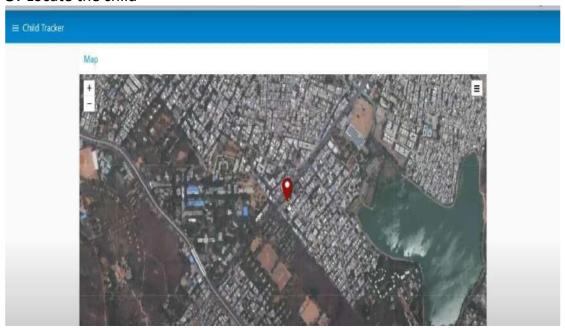

### 3. Create the GeoFence

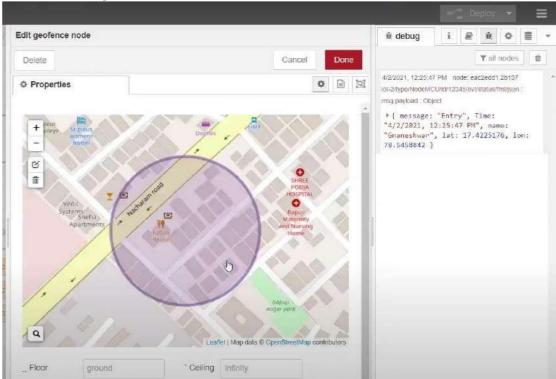

4. Edit the HTTP Request URL

### 5. Locate the child

**6.** Create the geofence node

7. Python script send requests to IBM Cloud.

```
Ca Console Z/A
